

# master of sustainable forest management

## are you interested in:

- forest land management
- wildland recreation planning
- habitat restoration
- site remediation
- silviculture
- forest operations
- urban forestry or parks management
- utility line management
- landscape planning
- environmental impact assessment
- conservation planning
- ecosystem management
- community forestry
- land use planning
- managing wildland-urban interfaces?

***...if you are, this could be the program for you!***

## some courses offered in this degree will be:

- fundamentals of sustainable forest management
- land information acquisition and analysis
- site-level forest land management
- landscape-level forest land management
- economics and administration of forestry

designed so that graduates meet the academic standards administered by the Canadian Forestry Accreditation Board (CFAB) as required for admission to the provincial professional forestry associations that are members of the Canadian Federation of Professional Forestry Associations (CFPFA).

*MSFM graduates will know how to design and implement site and landscape level plans that integrate the environmental, social and economic components of sustainability.*

This program prepares students for careers as forestry professionals in North America and overseas and sets the stage for life-long learning. It is

a master's program for natural resources professionals

# program profile

Our course-based Master of Sustainable Forest Management (MSFM) is designed for graduates of science-based bachelor's programs and provides advanced study in natural resource stewardship.

It is a one-year program at the University of British Columbia, Vancouver Campus. It begins in August with 2 weeks of classes and field work at one of our research forests.

Program components include:

- tree and stand dynamics
- forest to landscape: structure and function
- forest management
- economics and administration of forestry
- leadership skills: communication and critical reasoning
- information acquisition and analysis
- professionalism and ethics

**Studying at UBC's Faculty of Forestry has been an inspiring and thought-provoking process that has opened the door to new opportunities and experiences."**

*Maria Fernanda Tomaselli,  
MSc in Forestry graduate from Ecuador*

# place and promise

UBC has an exceptional learning environment that fosters global citizenship, advances a civil and sustainable society, and supports outstanding research to serve the people of British Columbia, Canada and the world.

- UBC's core values are:
- intellectual freedom
- advancing and sharing knowledge
- excellence and integrity
- mutual respect and equity
- protecting the public interest

# why the UBC Faculty of Forestry is a great place to study!

- UBC is a global leader in sustainability education
- The Faculty of Forestry is interdisciplinary and international in outlook with graduate students from 43 countries
- Our three research forests represent temperate rainforest, montane and sub-boreal ecosystems
- Vancouver is a cosmopolitan city set in the Coast Mountains. It's a world class urban centre located in an outdoor recreation paradise!
